

# Maximizing Domestic CBRN Response and Recovery Efforts

FEMA Chemical, Biological, Radiological and Nuclear Office | December 16th, 2020  
DHS/CISA/Chemical Security Seminar

**FEMA**

# Agenda

---

- Overview of the Domestic CBRN Threat/Hazard Environment
- Bridging gaps between CBRN preparedness, prevention and response: FEMA CBRN Office
- FEMA CBRN response capabilities and technology needs
- Q&A

**FEMA**

A blue-tinted photograph of an offshore oil rig in the ocean. The rig is a large, complex structure with multiple towers and platforms, situated in the middle ground. The foreground shows the deck of a ship with a person wearing a life vest and a white hard hat, looking out towards the rig. The water is dark blue with white foam from the ship's wake. The sky is a lighter blue with some clouds.

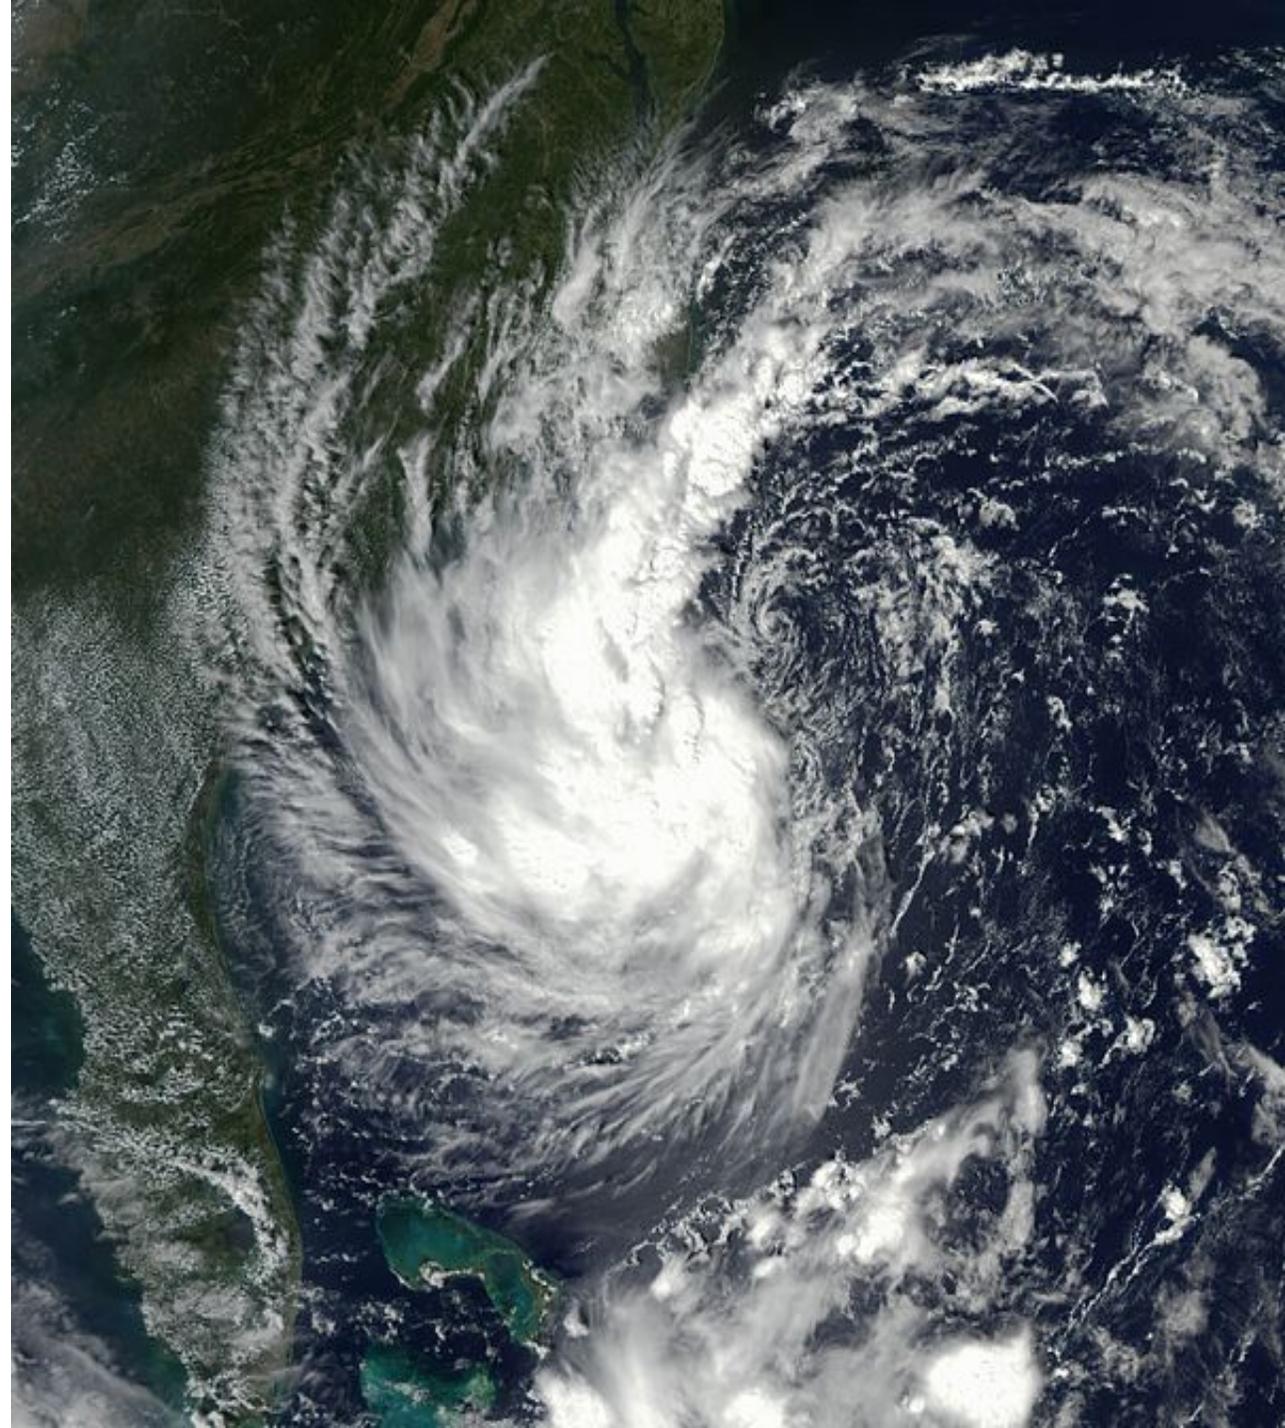

# Overview of Domestic CBRN Threats/Hazard Environment

## Potential Threat Actors and Vectors

- **Manmade Intentional:** lone wolves, terrorists, nation-states
- **Manmade Unintentional:** technology failures, accidental releases
- **Natural Disaster Induced:** cascading impacts of hurricanes, earthquakes, etc.

**FEMA**

## First Responder Challenges

- Response requires specialized units, equipment, and training
- Mutual aid and multi-agency, multi-jurisdictional interoperability
- Re-examination of traditional response TTPs to address first responder health and safety
- Concurrent broader impact on whole community health and safety

**FEMA**

# Domestic CBRN Planning Considerations

---

Initially, cause of incident may be undetermined with limited situational awareness.

Impact may cascade nationally, even for a localized event.

Potential for mass casualties and large-scale population displacement.

**FEMA**

# Domestic CBRN Planning Considerations

---

Existing SLTT capabilities and resources, including specialized response and emergency medical capability, may be overwhelmed, causing significant strain on the whole community

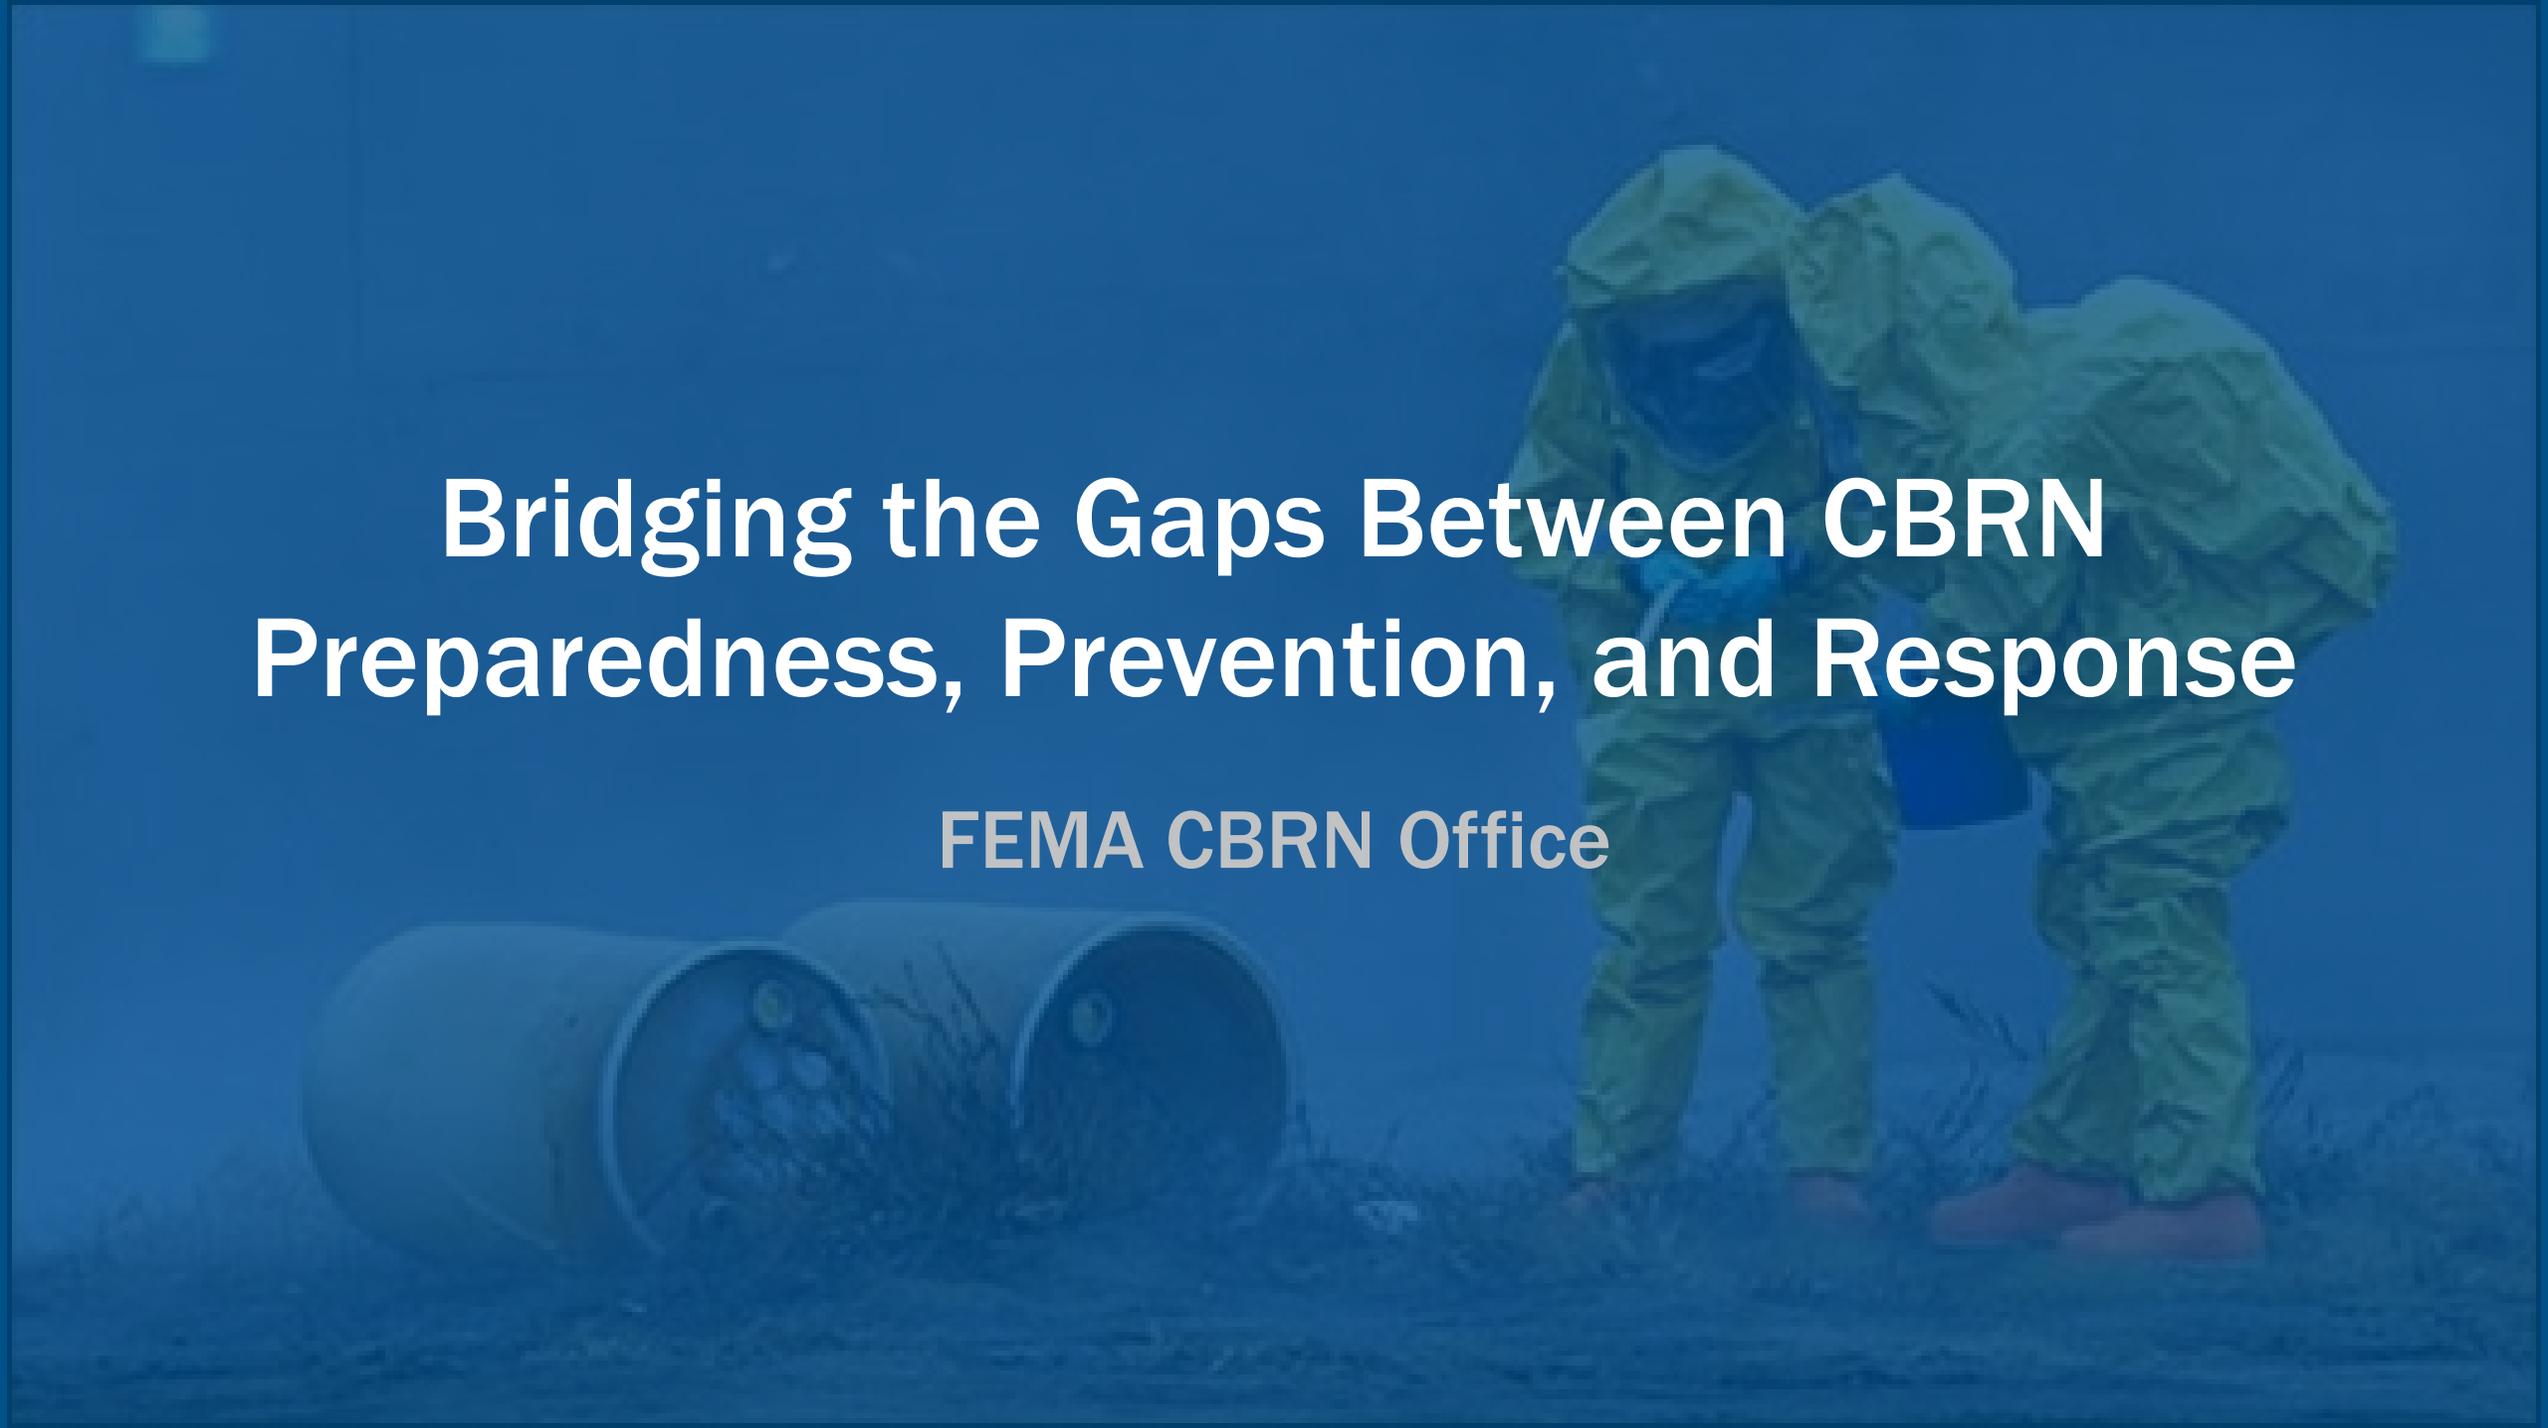

Timely, effective, and coordinated public guidance and messaging, including protective actions guidance, will be paramount.

First responders/receivers may be disproportionately affected depending on the nature of the event.

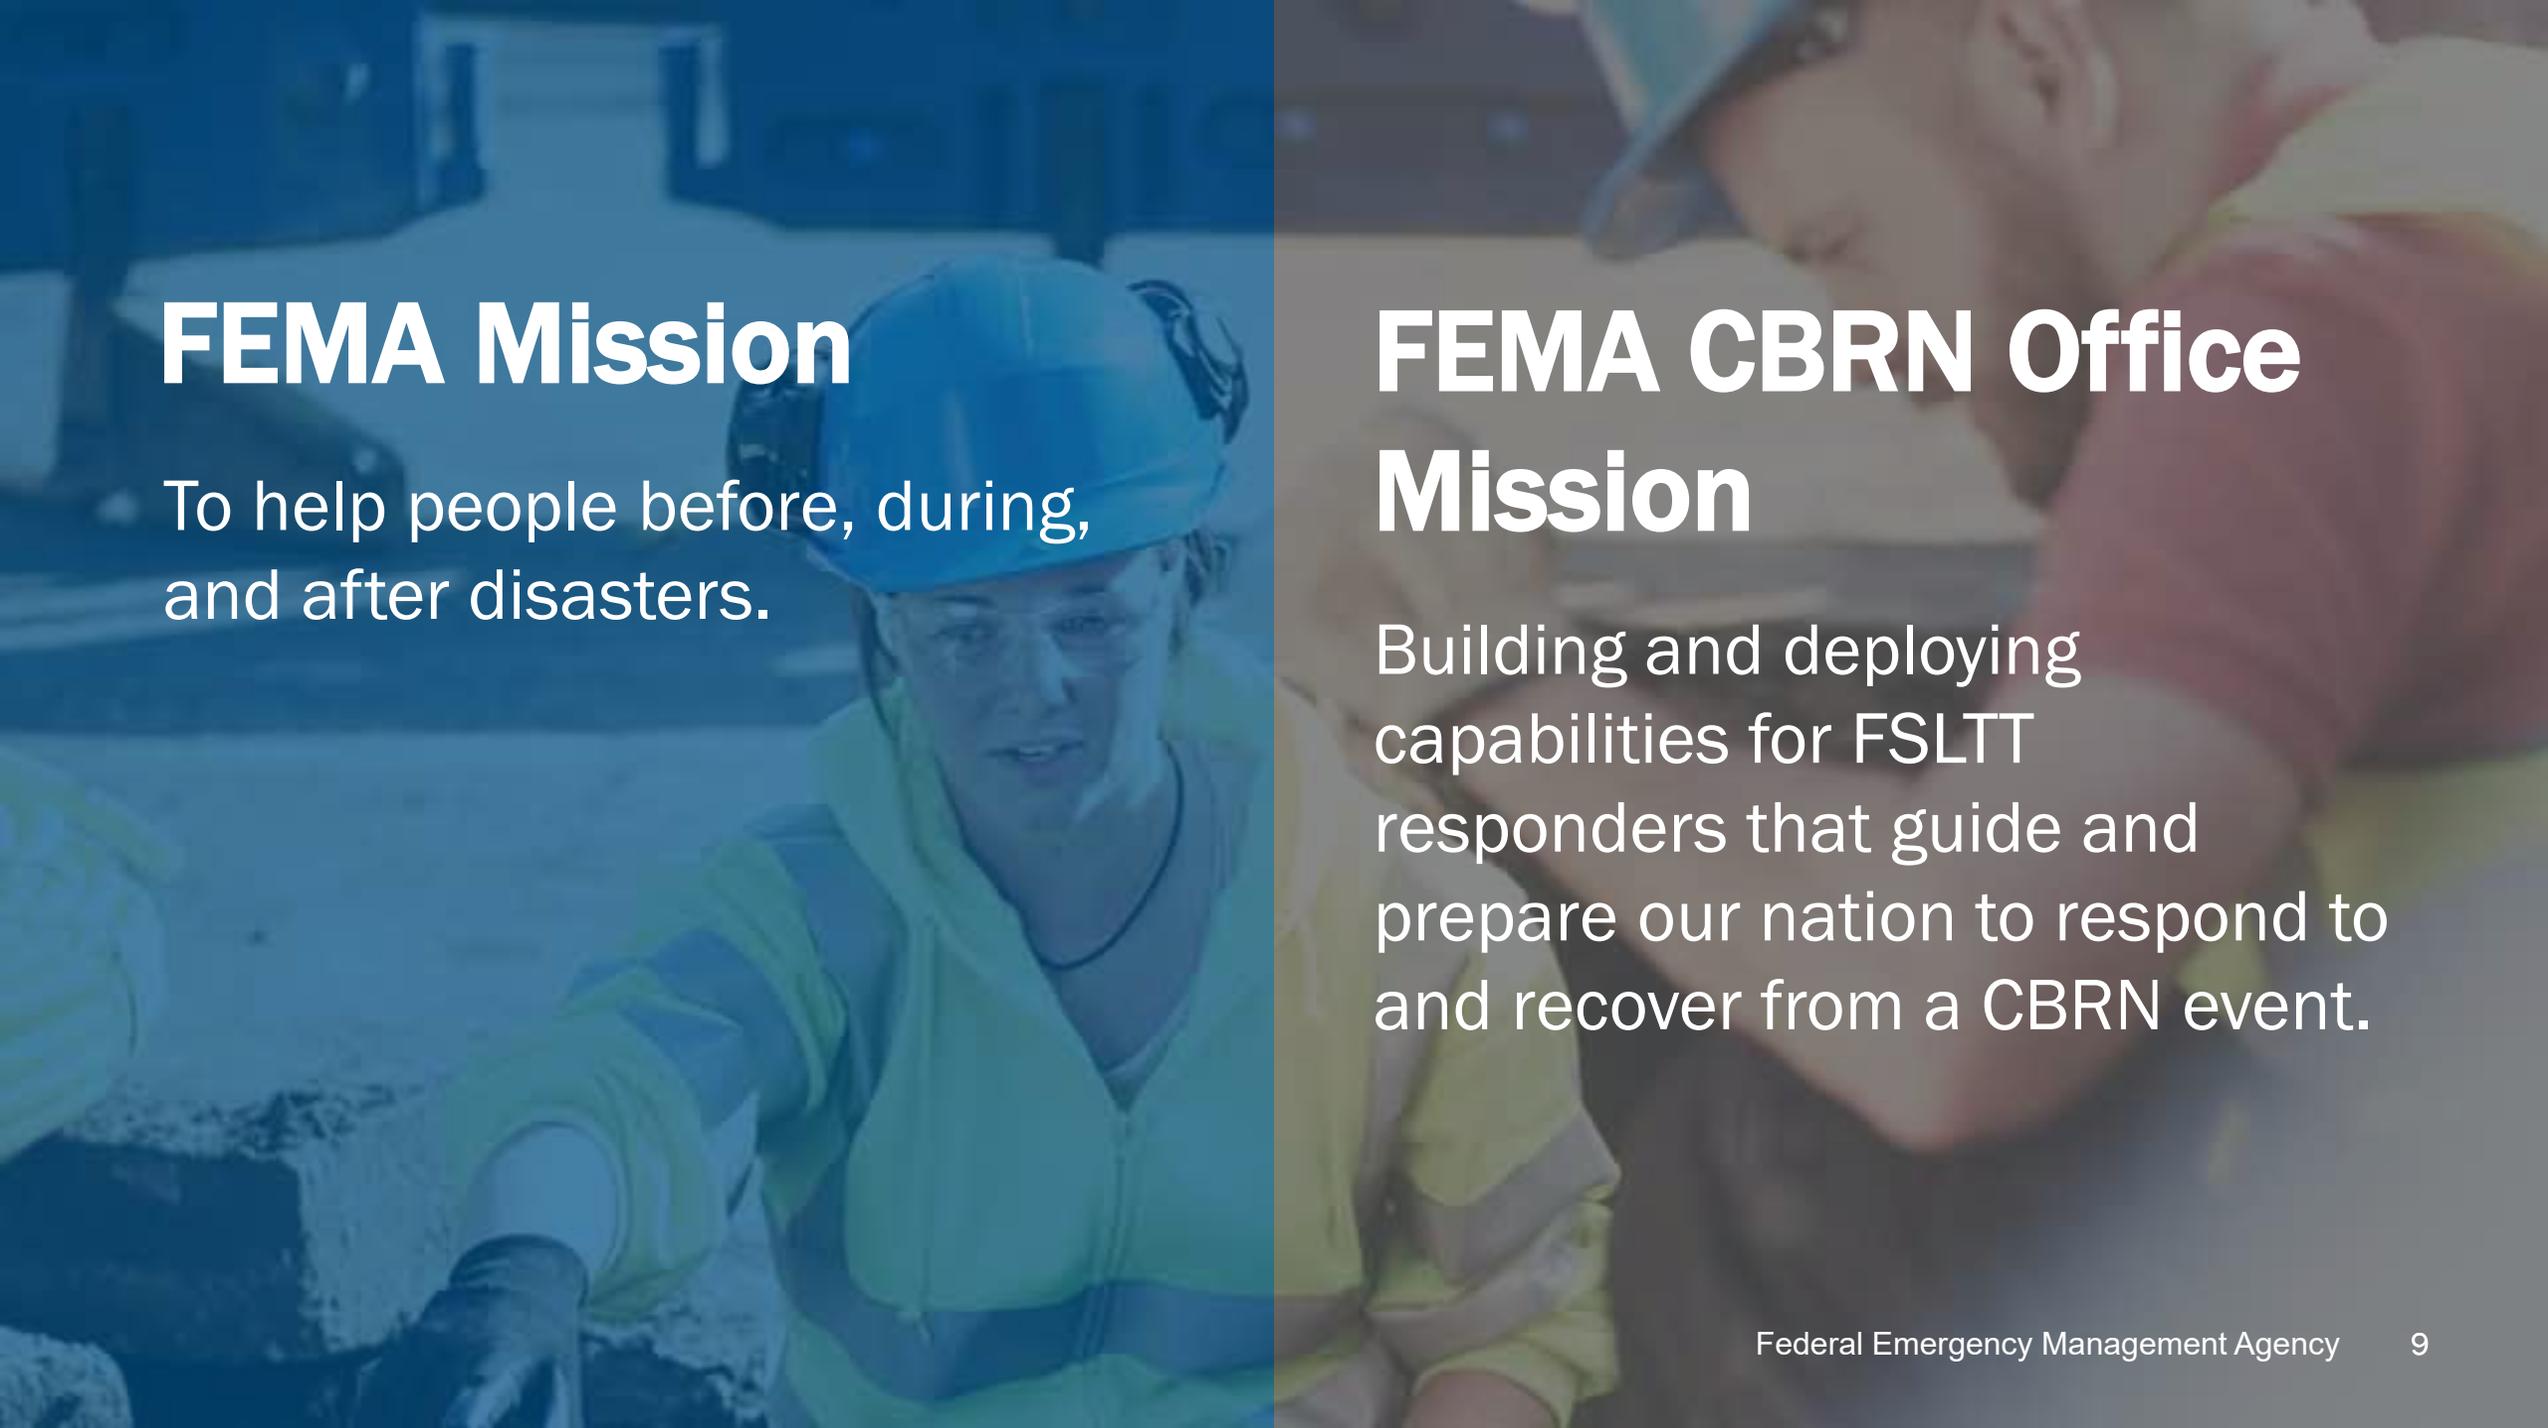

**FEMA**

The background image shows two individuals in full-body hazmat suits, including hoods and gloves, working in a field. They are leaning over a large spill of a dark, viscous substance. In the foreground, two large metal drums are lying on their sides, partially filled with the same dark substance. The entire scene is overlaid with a semi-transparent blue filter.

# Bridging the Gaps Between CBRN Preparedness, Prevention, and Response

FEMA CBRN Office

## FEMA Mission

To help people before, during, and after disasters.

## FEMA CBRN Office Mission

Building and deploying capabilities for FSLTT responders that guide and prepare our nation to respond to and recover from a CBRN event.

# Implementation Framework

Involves a mutually reinforcing series of strategies, policies, plans, operations, tools, training/exercises partnerships and outreach.

FEMA

# POLICY

- Update to the Oil and Chemical Incident Annex
- Chemical Defense Working Group
- Planning Framework for Chemical Incident Consequence Management

# Planning

## Plans:

- NRF/CBRN Annexes
- NRIA
- BIA
- OCIA
- IAAT – PPD-25
- National/Regional Plans
- City-Specific Plans

## Planning tools:

- Key Planning Factors
- City Planning Resource Tools

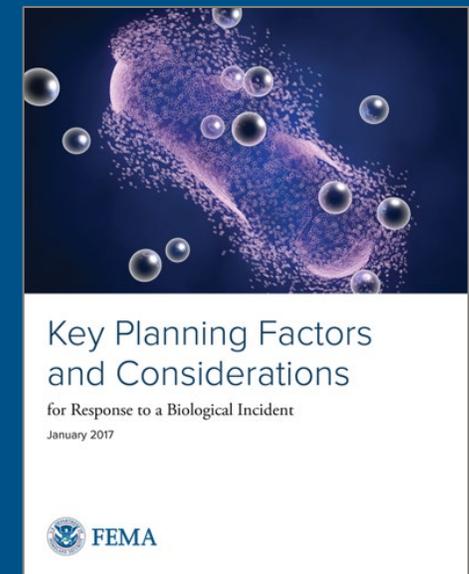

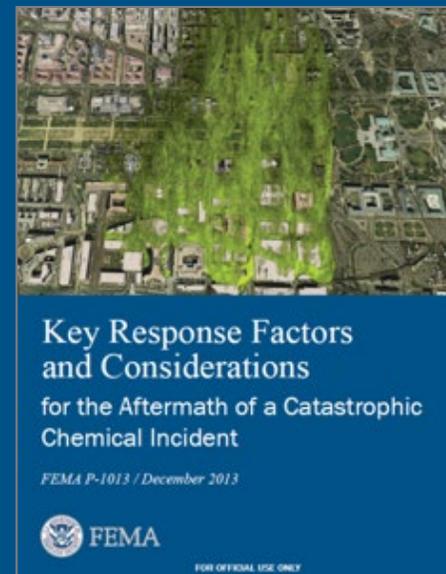

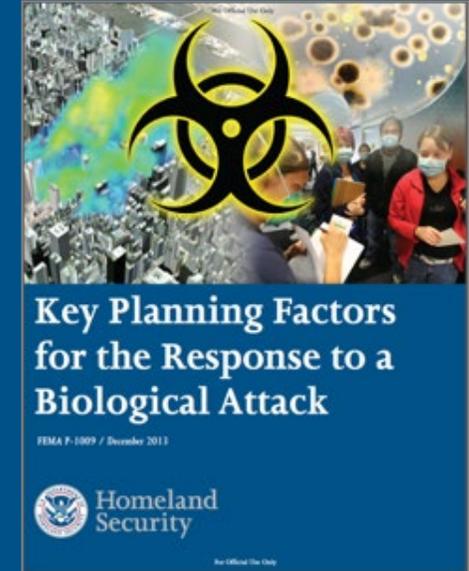

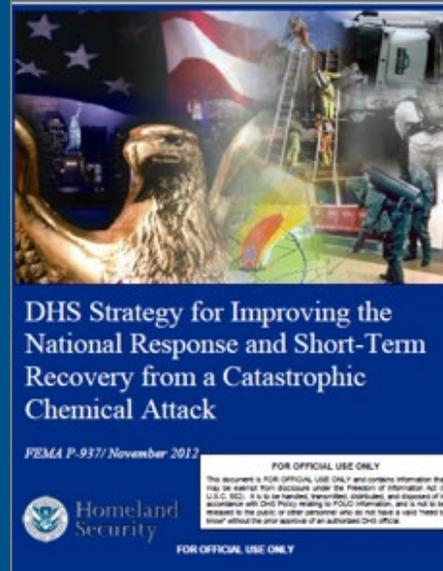

FEMA

# CBRN Key Planning Factors

- Regional response and recovery planners benefit from key planning factors (KPF) and other considerations for CBRN incident response.
- KPF documents and accompanying job aids align to the “Synchronized Operational Areas” described in the CBRN Incident Annexes to the Response and Recovery Federal Interagency Operational Plans (BIA, NRIA, OCIA).
- Include checklists for planning considerations and coordination for regional, state, local, tribal and territorial planners.

# City Planner Resource (CPR) Tool Suite:

for Federal, State, Local, Tribal, and Territorial  
Response and Exercise Planners

Web-based GIS suite of CBRN planning tools

*iCPR: IND City Planner Resource – beta version complete*

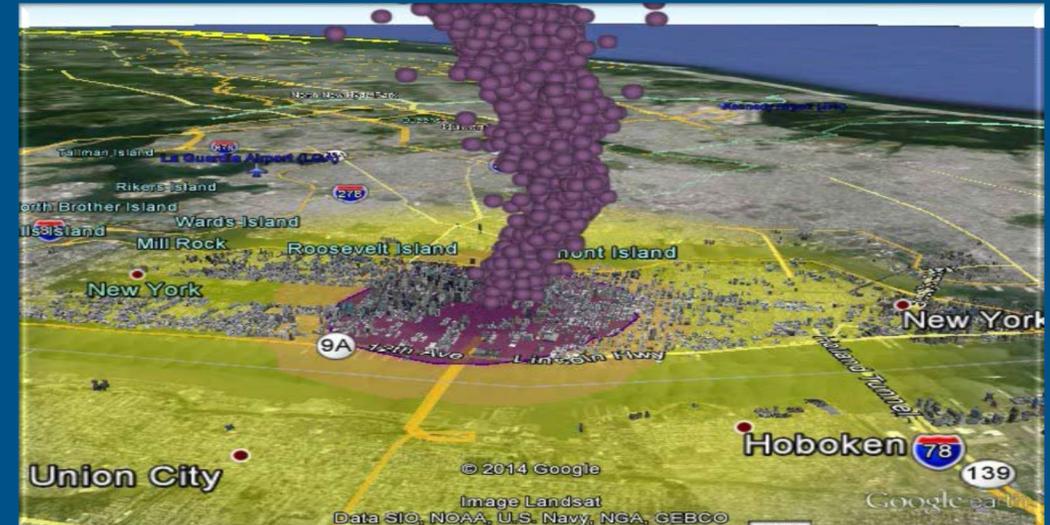

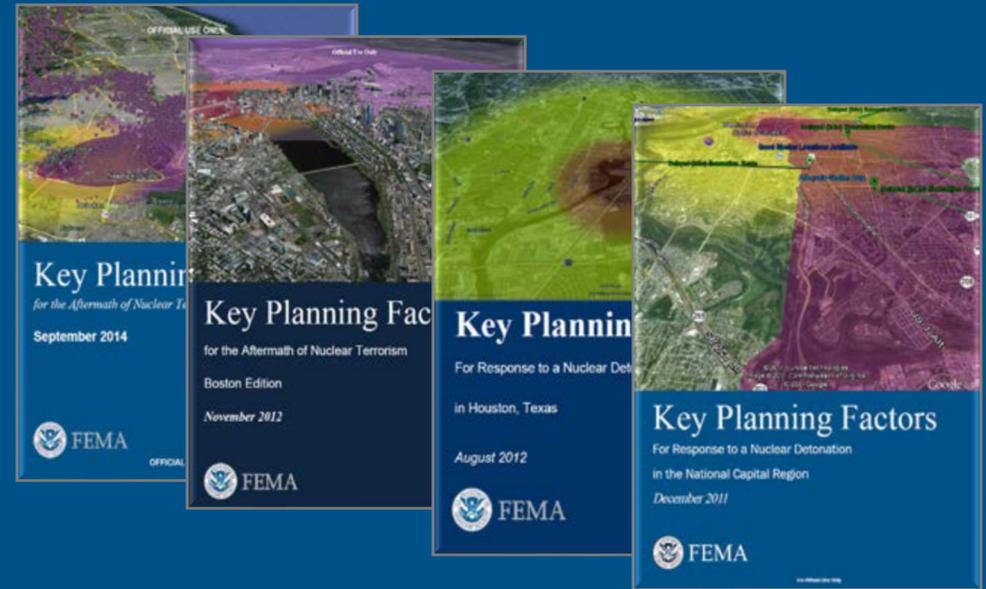

*chemCPR: Chemical City Planner Resource – in development*

*bioCPR: Biological City Planner Resource – in development*

- The need for the City Planner Resource Suite evolved out of the Key Planning Factors support provided to all FEMA regions and six cities.
- Supports strategic planning for large scale, high consequence events
- Builds off existing modeling capabilities
- Scenarios that will inform key planning considerations for a response at all levels of government (FSLTT) to save lives
- Provides in-depth contextual information informed through science-based analyses
  - Animations of event progression
  - Buildings, terrain, time and spatially varying weather, and gas density effects
  - Detailed community specific visuals
  - Scenario specific infrastructure impacts
  - GIS files for use in planner's GIS system

FEMA

# Operations

- Consequence Management Coordination Unit (CMCU)
- Domestic Emergency Support Team (DEST)
- Interagency Modeling & Atmospheric Assessment Center (IMAAC)
- Nuclear Incident Response Team (NIRT)

# Interagency Modeling & Atmospheric Assessment Center (IMAAC)

**MISSION:** Provide a single point for the coordination and dissemination of federal dispersion modeling and hazard prediction products that represent the federal position during actual or potential incidents involving hazardous atmospheric releases.

**LOCATION:** Virtual

**FEMA**

## Decision Products for Senior Leaders

- Tailored for senior leaders for strategic-level impact assessments and to inform public guidance
- Detailed modeling products for first responders and field emergency management officials

# IMAAC State & Local Outreach Efforts

## Serving:

- FSLTT first responders and decision-makers during actual or potential atmospheric HAZMAT incidents.

## Goal:

- Spread awareness of the IMAAC program and capabilities to increase the number of IMAAC activations initiated by first responders.

**FEMA**

The graphic features a background image of an industrial facility at night with bright orange and yellow lights. Overlaid on the right side is a green and blue geometric shape containing the IMAAC logo, the slogan "ALWAYS THERE WHEN YOU NEED IT!", and the website "FEMA.GOV/IMAAC". Below this shape, a dark blue banner contains the text "IN REAL-WORLD HAZMAT EMERGENCIES, ACTIVATE IMAAC 24/7 | (877) 240-1187".

**ALWAYS  
THERE  
WHEN YOU  
NEED IT!**

FEMA.GOV/IMAAC

IN REAL-WORLD HAZMAT EMERGENCIES, ACTIVATE IMAAC 24/7 | (877) 240-1187

# Tools and Standards

## CBRN Operational Tools:

- CBRNResponder
- RadResponder Network
- BioResponder
- ChemResponder

## Modeling Tools:

- Rapid Hazard Tool

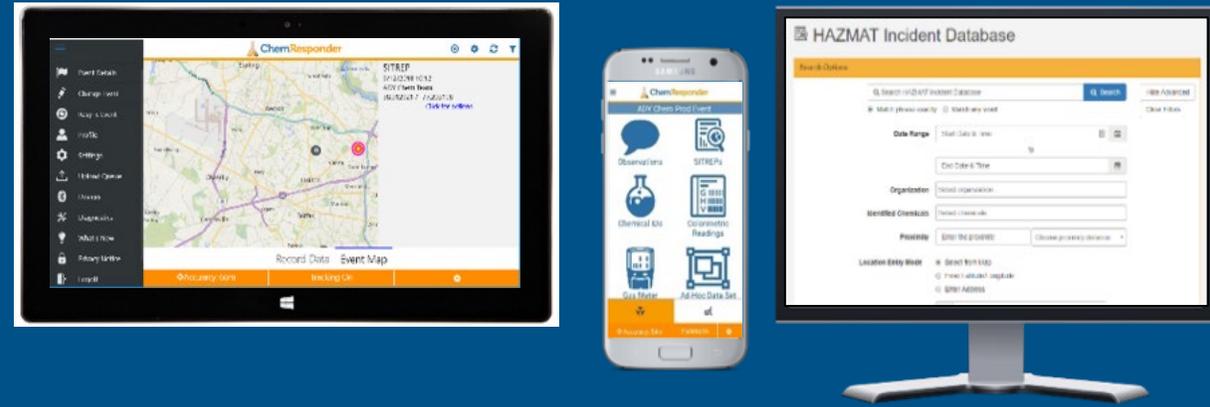

## CBRN Operational Support Specialists:

- Radiological Operations Support Specialist (ROSS)
- Chemical Operations Support Specialist (COSS)
- Biological Operational Support Specialist (BOSS) [pending]

# CBRNResponder Network: ChemResponder

- Provides powerful web-based and mobile platforms with a simple user interface to record, share, and manage hazmat response information and display it in a geospatial environment
- **Goal:** Serve as national standard for hazmat incident management by empowering responders with data collection and sharing capabilities, integrating disparate systems and providing the means for trend analysis and investigations of lessons learned

## ChemResponder

**MISSION:** A free solution for the collection, management, and sharing of CBRN incident information

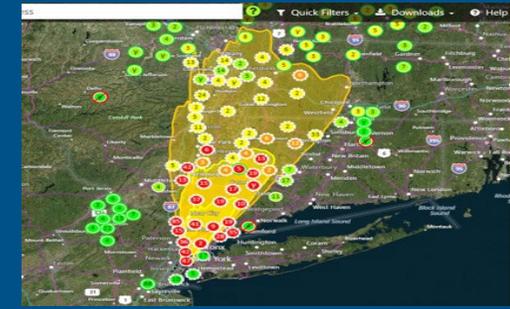

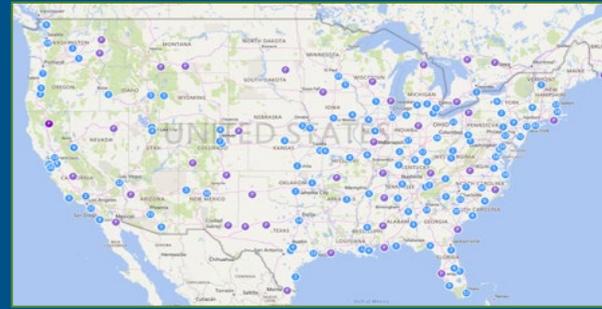

**LOCATION:** Ubiquitous

FEMA

# CBRNResponder Network: ChemResponder

- **Cloud database:**
  - Responders and teams
  - Equipment
  - Field surveys
  - Samples and analyses
- **Mobile apps:**
  - Collect data
  - Colorimetric results
  - Gas meter readings
- **Web portal:**
  - Data sharing
  - Creating partnerships
  - Mapping/GIS tools
  - Responder tracking
- **Integration efforts:**
  - Fixed sensors
  - Bluetooth equipment
  - Plume models

ChemResponder

RadResponder  
Network

BioResponder

**MISSION:** A free solution for the collection, management, and sharing of CBRN incident information

**LOCATION:** Ubiquitous

FEMA

# CBRN Operations Support Specialist (OSS)

- **MISSION:** During hazardous preparedness or response operations, the CBRN OSS identifies and provides critical information to responders, key leaders, and decision-makers. Serves as a state/local subject matter expert (SME) with the ability to bridge the gap between response and CBRN-specific knowledge in order to minimize the impact of a potential or actual incident involving the release of CBRN materials.
- **LOCATION:** SLTT jurisdictions

## Established:

Radiological Operations  
Support Specialist (ROSS)

## In Development:

Chemical Operations  
Support Specialist (COSS)

## Exploratory:

Biological Operations Support Specialist  
(BOSS)

(Being conceptualized based on COVID-19  
response lessons learned)

FEMA

# Training and Exercises

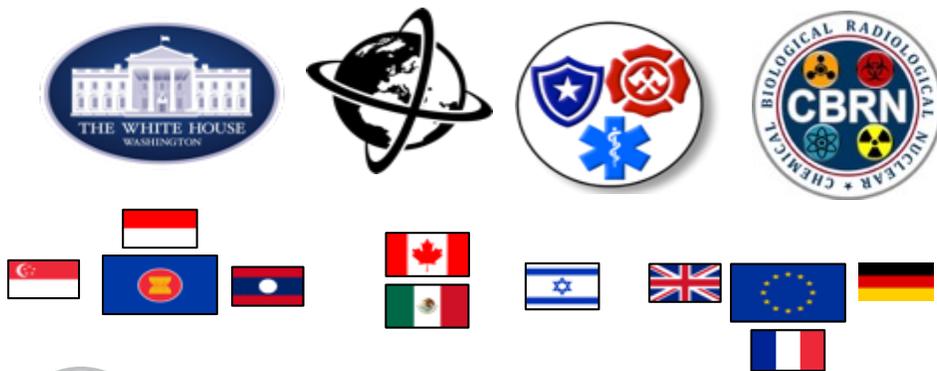

## CBRN Training for:

- NRCC
- IMATs
- CBRN coordinators
- FSLTT partners
- International partners
- Certification of Training at CTOS, CDP and EMI
- International exercises
- National level exercises
- Interagency TTXs
- Regional exercises
- REPP exercises
- CBRN Office drills

# Outreach & Coordination

- White House
- International
- Interagency
- DHS components
- FEMA directorates
- Regional CBRN coordinators
- Fusion centers
- WMD coordinators
- EPA
- DOE RAP teams
- Other
- SLTT partners

## The Future of the FEMA CBRN Office: Enhancing CBRN Response through FSLTT and Industry Partnerships

# The Future of the FEMA CBRN Office:

- ✓ Enhancing CBRN Response through FSLTT and Industry Partnerships

- ✓ Offer and expand the availability of our tools and resources
- ✓ Enhance technical, topical, and analytical competence in addressing risks
- ✓ Foster collaboration and partner empowerment
- ✓ Maximize the use of limited whole community resources

A group of emergency responders, including firefighters and police officers, are gathered in a residential area. Some individuals are wearing high-visibility vests with labels such as "TECON OFFICER" and "FISCAL OFFICER". The scene is overlaid with a blue tint, and the text "FEMA CBRN Response Capabilities and Technology Needs" is prominently displayed in white on the left side.

# FEMA CBRN Response Capabilities and Technology Needs

# FEMA CBRN Response Capabilities and Technology Needs

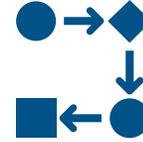

---

Comprehensive, integrated and multi-jurisdictional (local, regional, national) situational awareness and decision support

High quality, standardized and rapidly accessible data on impacted population, critical infrastructure and capability providers

Visibility into and dynamic interface with global supply chains, particularly regarding medical supplies, equipment, pharmaceuticals and other countermeasures

Strategic integration with private sector, including rapid sharing of event information

**FEMA**
