# Exercise Overview

- Exercise scope: [Insert exercise type, duration, location(s), and parameters from the Situation Manual]
- Mission area(s): Prevention, Protection, Mitigation, Response, and Recovery [Select Mission Areas identified in the Situation Manual]

# Exercise Objectives

1. [Insert Objectives from Situation Manual]

# Core Capabilities

- Planning
- Intelligence and Information Sharing
- Public Information and Warning
- Risk Management for Protection Programs and Activities
- Public Information and Warning
- [Update Core Capabilities to reflect those included in the Situation Manual.]

# Exercise Roles

- **Players** are personnel who have an active role in discussing or performing their regular roles and responsibilities during the exercise. Players discuss or initiate actions in response to the simulated emergency. They respond to the situation presented based on current plans, policies, and procedures.
- **Observers** do not directly participate in the exercise; however they may support the development of player responses to the situation during the discussion by asking relevant questions or providing subject matter expertise.

# Exercise Roles (cont.)

- **Facilitators** provide situation updates and moderate discussions. They also provide additional information or resolve questions as required. Key Exercise Planning Team members also may assist with facilitation as subject matter experts (SMEs) during the exercise.
- **Data Collectors** observe and record the discussions during the exercise, participate in data analysis, and assist with drafting the After-Action Report (AAR).

# Exercise Structure

**Module One – [Insert Title]**

**Module Two – [Insert Title]**

**Module Three – [Insert Title]**

- Each module will begin with an update summary of key scenario events.
- Participants will then engage in issue-based discussions.
- The facilitator will manage time allotted for each discussion period.
- The exercise will conclude with a participant Hot Wash.

# Exercise Guidelines

- This exercise will be held in an open, low-stress, no-fault environment. Participants should expect varying viewpoints, even disagreements.
- Respond to the scenario using your knowledge of current plans and capabilities and insights derived from your understanding of plans, policies, and procedures.
- Decisions are not precedent setting and may not reflect your organization's final position on a given issue. This exercise is an opportunity to discuss and present multiple options and possible solutions.
- Issue identification is not as valuable as suggestions and recommendations that could improve response and recovery efforts. Exercise participants will benefit most when they focus on problem solving efforts.

# Assumptions & Artificialities

- The adversary and events are fictional and do not reflect actual intelligence.
- The exercise is conducted in a no-fault learning environment wherein capabilities, plans, systems, and processes will be evaluated, not the participants.
- The exercise scenario is plausible, and events occur as they are presented.
- There are neither “hidden agendas” nor any “trick questions.”
- All players receive information at the same time.
