

# KNOW YOUR CHEMICALS

Chemicals are critical to our economy, national security, and public health. But in the wrong hands, dangerous chemicals can be weaponized by terrorists.

- ▶ What is your facility's security posture?
- ▶ Do you know if your facility possesses dangerous chemicals that could be weaponized by terrorists?
- ▶ What security does your facility have in place to prevent chemicals being weaponized?

## Chemical security is national security.

The Cybersecurity and Infrastructure Security Agency's (CISA) ChemLock program is a completely voluntary program that provides facilities that possess dangerous chemicals no-cost services and tools to help them better understand the risks they face and improve their chemical security posture in a way that works for their business model.
